METHODOLOGY

CORE RESEARCH OBJECTIVES

Cultural Normalization

How betting has become embedded in daily life, social circles, and media consumption among young Portuguese adults

Risk Perception

How does digital payment tools, app design, and social influence distort the perceived financial and psychological risks of online gambling

Intervention Openness

Whether biometric nudges (smartwatch alerts) are seen as helpful tools or unwelcome intrusions during active betting sessions

Main Research question:

How does the normalization of online betting in Portuguese youth culture shape betting behaviours, risk perception, and openness to biometric harm-reduction tools?

INTERVIEW SCRIPT

1. This conversation is confidential, and the recording will only be used for transcription and academic analysis purposes. Do you agree?
2. Why do you think betting has become so common among young adults in Portugal?
3. In your daily life, in which places or moments do you usually notice the presence of advertising or references to online betting?
4. How often does the topic of betting usually appear in your life ?
5. At what age would you say you were exposed to gambling or betting for the first time?
6. In what ways do you feel there is a greater incentive for online betting today compared to the past?
7. How often do you usually bet?
8. How much do you think the decision to bet online is influenced by friends or social groups?
9. How many of your friends bet regularly?
10. How would you describe the current relationship between "being a football fan" and using betting platforms?
11. In your opinion, why is betting on a football match viewed differently from other games of chance(casinos or other)?
12. How does using methods like MBWay and banking apps alter the perception of the value of money spent, compared to physical cash?
13. In what ways does using online apps influence the motivation and ease of betting?
14. What is your typical process or routine when you decide to place a bet?
15. Tell me about what you consider to be the signs that someone is losing control over their betting behavior.
16. Nowadays, there is a lot of talk about using Artificial Intelligence or algorithms to help predict betting results. What are your thoughts on using these types of tools?
17. What is your opinion on the idea of a device (such as a Smartwatch) intervening during a betting session to suggest a break due to stress?
18. Before we finish, is there anything else you consider important regarding online gambling, cultural normalization, football culture, advertising, or risk perception that we haven't covered?

METHODOLOGY OVERVIEW

Semi-Structured Interviews

- 18-question interview script
- Conducted in Portuguese & English
- Audio-recorded, video & transcribed
- Bettors and non-bettors included.

Mixed Question Types

- Qualitative & quantitative questions
- Frequency scales for behavioural measures
- Open-ended & structured questions interview.
- Exposure age, peer influence, betting frequency.

Qualitative Thematic Analysis

- AI-assisted topic modelling (18 questions)
- Topic with ID, description, keywords, participants IDs, & n_participants.
- Evidence quotes linked to each topic and participant.

This research seeks to understand how the digitalization of gambling has shaped betting behaviours and risk perception among young Portuguese adults, and to assess whether technology-based interventions could serve as effective harm-reduction tools.

THEMATIC ANALYSIS MAPPING

Protocol Question	Core Research Topic	Analytical Keyword Focus
Q1 - Q2	Online Gaming / Normalization	Social acceptance, influence
Q3 - Q5	Advertising & Sponsorship	Television, social media, public figures
Q10 - Q11	Sports and Football Culture	Fandom vs. Betting, Routine integration
Q12 - Q13	Adoption & Tech Interaction	MBWay, Banking apps
Q17	Smart Health Intervention	Smartwatch nudges, Privacy perception

FINDINGS

KEY FINDINGS

1. Online betting has become highly normalized in everyday life.

This suggests that betting is no longer perceived as a niche activity but as part of daily digital culture.

2. Social media and advertising play a major role in exposure.

Participants repeatedly mentioned social media is the key drivers of betting visibility.

3. Accessibility increases participation and normalization.

Many participants emphasized that betting is mobile and online available

4. Betting is associated with both entertainment and financial gain.

Participants often linked betting with football enjoyment.

5. Exposure to betting starts at an early age.

Several participants reported first exposure during adolescence through friends & family.

CONTRADICTIONS IN BETTING PERCEPTIONS

Inconsistency 1: Normalized Yet Concerning

Normalized Behavior	Perceived Risk
"It's very commonplace."	"It's growing exponentially."

Insight: Participants described betting as a normal part of everyday life while simultaneously expressing concern about its rapid growth and ease of access.

CONTRADICTIONS IN BETTING PERCEPTIONS

Inconsistency 2: Skill vs. Luck

Skill Based Activity	Game of Chance
"People can make money with something they like."	"Casino games... games of chance."

Insight: Some participants related betting with knowledge (sports) and strategy, while others perceived primarily as luck based gambling.

CONTRADICTIONS IN BETTING PERCEPTIONS

Inconsistency 3: High Exposure, Low Awareness

Constant Exposure	Limited Awareness
Ads, influencers, sponsorships are everywhere	"I didn't even realize Betano was betting."

Insight: Although participants are heavily exposed to betting related content in their daily life, some participants no longer consciously notice it due to normalization.

CONTRADICTIONS IN BETTING PERCEPTIONS

Inconsistency 4: Social Activity vs. Private Habit

Social Experience	Individual Behavior
Conversations with friends and football discussions	Betting alone on mobile devices

Insight: Betting is perceived both as a shared social activity and as an individual digital habit.

CONTRADICTIONS IN BETTING PERCEPTIONS

Inconsistency 5: Financial Opportunity vs. Financial Risk

Easy Money Perception	Concern About Harm
Betting seen as a way to earn money	Concerns about manipulation and addiction

Insight: Participants viewed betting as both a financial opportunity and a potentially harmful activity.

CONCLUSIONS

CONCLUSION

- Online betting has become highly normalized in the daily lives of young adults in Portugal.
- Social media, football culture, influencers, and advertising increase visibility and exposure.
- Easy digital access contributes to the betting behaviors normalization process.
- Participants perceive betting as both entertainment and a financial opportunity but concerns about addiction, manipulation, and youth exposure remain present.
- There is a tension between social acceptance and perceived risk.
